## Summary

Passionate full stack web developer with a background in advocacy, service, and collaboration. Thrives when creating inclusive, user-centered applications and in team-based environments. Actively seeking a remote software development role that supports continued learning while contributing to impactful projects.

## Technical Skills

- Languages & Tools: JavaScript, TypeScript, HTML, CSS, Markdown, YAML, Python, SQL, NoSQL, PostgreSQL
- Frameworks & Libraries: React, Node.js, Express.js, MongoDB, GraphQL, MERN stack
- Tools & Services: GitHub, Git, CI/CD, Render, VSCode, AI-assisted Prompt Engineering, Cypress, Circle CI
- Practices: Agile methodology, Pair Programming, Test-Driven Development, Unit Testing

## Projects

**Gamerverse – Social Platform for Gamers** – <https://gamerverse-jewx.onrender.com/>

- Built a full-stack social platform for gamers to connect, share game libraries, and create posts.
- Implemented secure authentication system with email/password and OAuth integration.
- Integrated GraphQL API for efficient querying and mutation of user data.
- Designed a robust MongoDB schema to handle users, posts, games, and moderation logs.
- Deployed using Render with CI/CD pipelines for automated testing and deployment.

**Kadence – A Square Breathing Application** – <https://thomas-b01.github.io/Project-1-repo/>

- Developed a guided breathing web app promoting mental wellness.
- Features include light/dark mode toggle and custom color themes.
- Utilized CSS animations to guide users through square breathing.
- Included a short quiz that provides mental health resources.
